PROFESSIONAL SUMMARY

Full-Stack Developer adept at creating scalable web applications with **React, Node.js, Express.js**, and **MongoDB**. Specializes in clean architecture, **RESTful APIs**, authentication systems, and responsive user interfaces to deliver efficient and user-friendly applications.

EDUCATIONS

Modern Institute of Technology and Research Center | Alwar, Rajasthan
B.Tech in Computer Science Engineering

Sep 2023
CGPA : 8.8

WORK EXPERIENCE

Software Engineer Intern | Internship
Sucess Ladder Technologies

May 2026 - Present
On-site • Alwar, Rajasthan

- Developed **Audit**, a full-stack MERN application for **automated website performance**, SEO, accessibility, and security analysis.
- Integrated audit tools to produce **comprehensive reports** with actionable recommendations for **website optimization**.
- Created a responsive dashboard to visualize **website health metrics**, audit scores, and performance trends.
- Designed and implemented **RESTful APIs**, authentication, and report management features to enhance user experience.

Technologies / Skills Used : Node.js, React, Express, MongoDB, Tailwind CSS, AI Integration, Gemini API

PROJECTS

EduMarket | 🐙 Github

Jun 2026 - Present

- Developed a **full-stack marketplace** using **React.js, Node.js, Express.js**, and **MongoDB** to facilitate the sharing and management of educational resources.
- Implemented **JWT-based authentication** and **role-based access control** to ensure secure access to student and creator features.
- Built functionalities for material **upload, search, wishlist**, and **dashboard** to enhance user experience and streamline content management.
- Designed **RESTful APIs** and a **responsive UI**, ensuring efficient data handling and seamless interaction across devices.

Technologies / Tools Used : React, Node.js, Express, MongoDB, Tailwind CSS

CAPTCHA Accessibility Analyzer & Solver (Research Tool)

- Developed** a web-based research tool utilizing **OCR** and **OpenCV** to analyze CAPTCHA accessibility challenges for visually impaired users.
- Built** a **Flask**-based backend featuring secure user authentication and a dashboard to visualize analysis results.
- Processed** and evaluated CAPTCHA images to identify barriers impacting assistive technologies and accessibility tools.
- Documented** accessibility issues and generated insights to promote more inclusive and user-friendly CAPTCHA designs.

Technologies / Tools Used : Python, Flask, OpenCV, OCR

SKILLS

Databases :	MongoDB
Frameworks & Libraries :	Node.js, Express.js
Programming Languages :	C, C++, Python, JavaScript
Tools & Platforms :	Git, GitHub, Postman
